

Brežice, Slovenia

Population

agglomeration: 24,086
city: 6,759

Land area

9 km²

Population density

760 inhabitants/km²

The town of Brežice lies in an area that is well connected by roads and a railway – connecting the capital city Ljubljana and Croatian capital Zagreb. The municipality has intensive daily migration activity, where cars are still the most common means of transportation for commuters travelling to work and to other parts of the region.

There is no local public transportation in the municipality. Walking and cycling in the municipality are not common since the infrastructure is not suitable for it - there are no cycling paths and sidewalks are very rare.

Therefore expansion and adaptation of cycling and pedestrian infrastructure is necessary in order to make these modes of mobility more attractive.
