

# Cerknica, Slovenia

## Population

agglomeration: 11,491  
city: 4,061

## Land area

15 km<sup>2</sup>

## Population density

279 inhabitants/km<sup>2</sup>

Cerknica lies close to the railway, motorway and other important roads, so there is a lot of transit traffic in the municipality. Roads are frequently used by citizens that use cars as the most common means of transportation. Public transportation is rarely used.

The citizens wish to change their travel habits, to use public transportation and other modes of sustainable transportation but demand improvement of public transportation and suitable infrastructure.
