

# Krško, Slovenia

## Population

agglomeration: 25,833  
city: 7,097

## Land area

6 km<sup>2</sup>

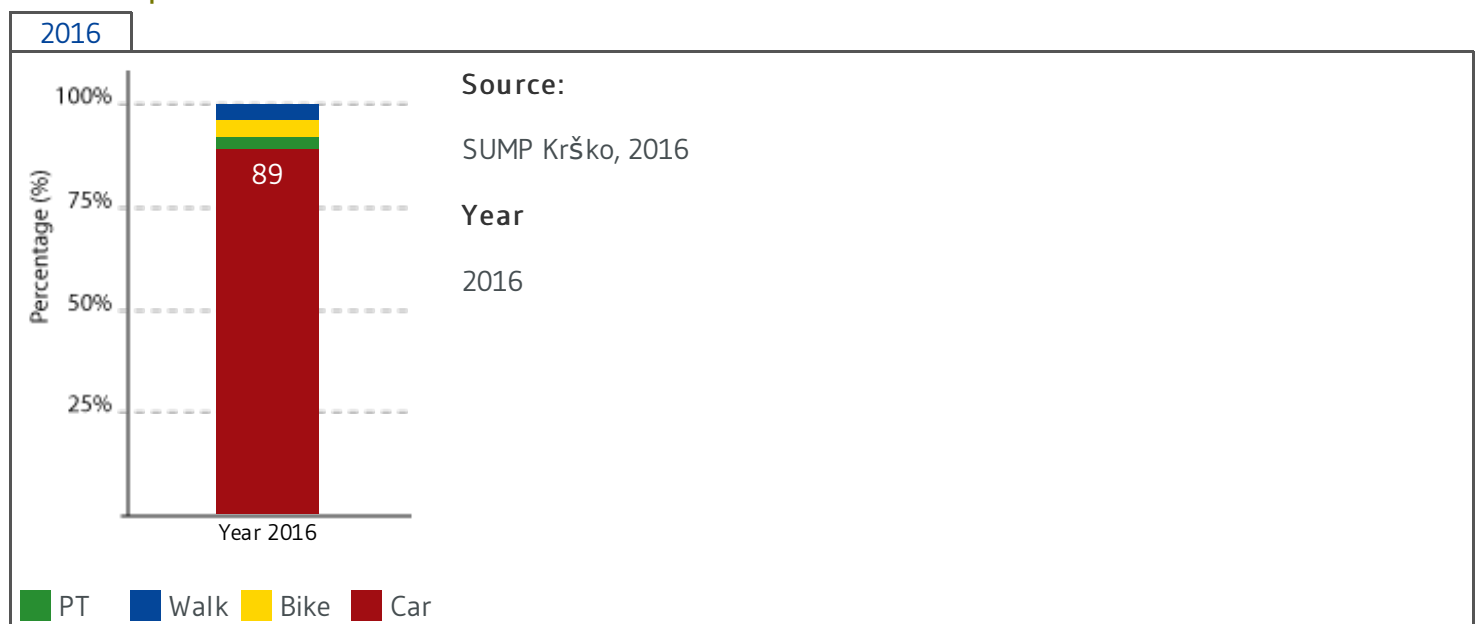

## Population density

1186 inhabitants/km<sup>2</sup>

Krško lies on a flat terrain that is ideal for cycling but the cycling network is poorly developed and not connected. Numerous cars parked in the old city centre are making it unattractive for cycling and walking. There is heavy traffic on the roads, including transit traffic.

Public transportation, both bus and train, are well functioning. Nevertheless, public transportation is not used daily by the residents, so cars are still the most common means of transportation in the municipality.

## Status of the Sustainable Urban Mobility Plan

[Sustainable Urban Mobility Plan](#) exists.

Municipality of Krško adopted its 1st SUMP in 2017 and is actively implementing it.
