

# Polzela, Slovenia

## Population

agglomeration: 6,172  
city: 2,367

## Land area

4 km<sup>2</sup>

## Population density

640 inhabitants/km<sup>2</sup>

Polzela is well connected to regional and national road and railway network. It is facing issues involving intensive daily migration activity where cars are still the most common means of transportation. There is a local bus and an intercity bus that is quite frequent during the workdays but is too infrequent on weekends to be commonly used the whole week. The train connection to other towns is efficient since it takes the same time as driving with a car. The municipality has a bicycle sharing system together with the neighbouring municipalities.

The short distances make the town of Polzela ideal for walking and cycling, but to make these modes more attractive the network expansion and adaptation of cycling and pedestrian infrastructure is necessary.
