## Population

agglomeration: 6,797  
city: 4,594

## Land area

3 km<sup>2</sup>

## Population density

1414 inhabitants/km<sup>2</sup>

Prevalje is a border municipality that faces issues with heavy traffic on the roads. Cars are still the most common means of transportation.

The development in the recent years has been mainly focused on road infrastructure, leaving other modes of mobility neglected. Pedestrian and cycling infrastructure are underdeveloped not attractive for people. Public transport is not frequent enough to be recognised as a convenient mode of transportation.
