

# Slovenska Bistrica, Slovenia

## Population

agglomeration: 25,524  
city: 8,016

## Land area

8 km<sup>2</sup>

## Population density

1006 inhabitants/km<sup>2</sup>

Slovenska Bistrica lies next to the motorway that makes the municipality very well connected and accessible. The municipality has intensive daily migration activity, where cars are still the most common means of transportation for commuters travelling to work.

People use cars even for short trips that can be done by bicycle. But cycling is not one of the common means of transportation because the infrastructure is very poorly developed. On the other hand, people are satisfied with pedestrian infrastructure. Public transportation to other parts of the region is frequent, but train station and bus station have an inopportune location, away from the town centre.
