

Vrhnika, Slovenia

Population

agglomeration: 16,978
city: 8,701

Land area

19 km²

Population density

460 inhabitants/km²

Vrhnika is well connected to the national road network. The municipality has intensive daily migration activity, where cars are still the most common means of transportation for commuters travelling to work and to other parts of the region.

Therefore, there is heavy traffic, also in the town centre. It lowers the interest of people for walking or cycling. Public transportation is not common as mode of mobility because it is not efficient enough. Cycling infrastructure connecting municipalities in the region will be built in following years.
